ENSCRIBE MAGNETIC GLASS BOARDS

Enscribe Magnetic Glass Boards are a solution for agile visual ideation, information radiation and thought transparency. We design and build to your specifications with a range of fully customisable colours and sizes. Importantly, Enscribe magnetic glass boards are easy to write on and easy to clean. The surface never deteriorates.

Our frame-less construction allows any vertical surface to be used as a seamless presentation area. Enscribe's line of mobile whiteboards allow for brainstorming and collaboration when wall space isn't available. Whether in use or not, the modernist lux of magnetic glass panels are a design feature in any space. Where projects require a specific finish or finishes we are able to match standard Dulux & RAL colours. Enscribe Magnetic Glass Boards can have images, templates or logos incorporated within the design.

TEAM WORK

For many people, the project's `aha!` moment comes during co-design when your team can seeing actual process and outcomes presented visually.

Scrum Boards like the one above are working agile system that a team use to visualise the 'Sprint' process.

The Sprint is a time-box of one month or less during which a "Done", useable, and potentially releasable product increment is created. Sprints have consistent durations throughout a development effort. A new Sprint starts immediately after the conclusion of the previous Sprint.

This process encourages ownership as each team member can see how they fit into the ecosystem of that project and how the team is tracking towards the "Done".

Sprints are limited to one calendar month. When a Sprint's horizon is too long the definition of what is being built may change, complexity may rise, and risk may increase. Sprints enable predictability by ensuring inspection and adaptation of progress toward a Sprint Goal at least every calendar month. Sprints also limit risk to one calendar month of cost.

COLLABORATION

Collaboration is a key factor in building a project because it works. People thrive in environments which free them to communicate and work together.

10 Simple ways to cultivate team cohesion

1. Use a Team Collaboration Portal.
2. Create a clear and compelling cause.
3. Communicate expectations.
4. Establish team goals.
5. Leverage team-member strengths.
6. Foster cohesion between team members.
7. Encourage innovation.
8. Keep promises and honour requests.
9. Encourage people to socialise outside of work.
10. Recognise, reward and celebrate collaborative behaviour.

SPACE/S TO THINK

Nick Cave in his ‘Red Hand Files’ writes;

“I have rarely sat down at my desk with something to say, other than I am ready. The sitting comes first, turning up with a certain alertness to possibility. Only then does the idea feel free to settle. It settles small and very tentatively, then, through your active attention, it can grow into something much bigger. Sitting in a readied state can sometimes last a long and anxious time. But you must not despair! I have never found a situation where the idea refuses to come to the prepared mind.”

COLOUR

Colour theory is a subjective philosophy. We know from experience that when it comes to colour, there are rarely wrong answers. We also know that colour inspiration can be found just about anywhere; your favourite cushion or the sun lighting up your doorstep, the brightly coloured packaging in an Asian alley. While we have a collection of on trend colours in our stable we will custom manufacture to any colour in the Dulux or RAL books.

SUPERIOR SURFACE

Both the Enscribe Magnetic Glass Boards and Enscribe Mobile Magnetic Glass Boards writing surface is superior to standard whiteboard surfaces due to its hard wearing nature and aesthetics.

Standard whiteboards scratch and build up ink residue causing them to look worn out and dirty in a short space of time.

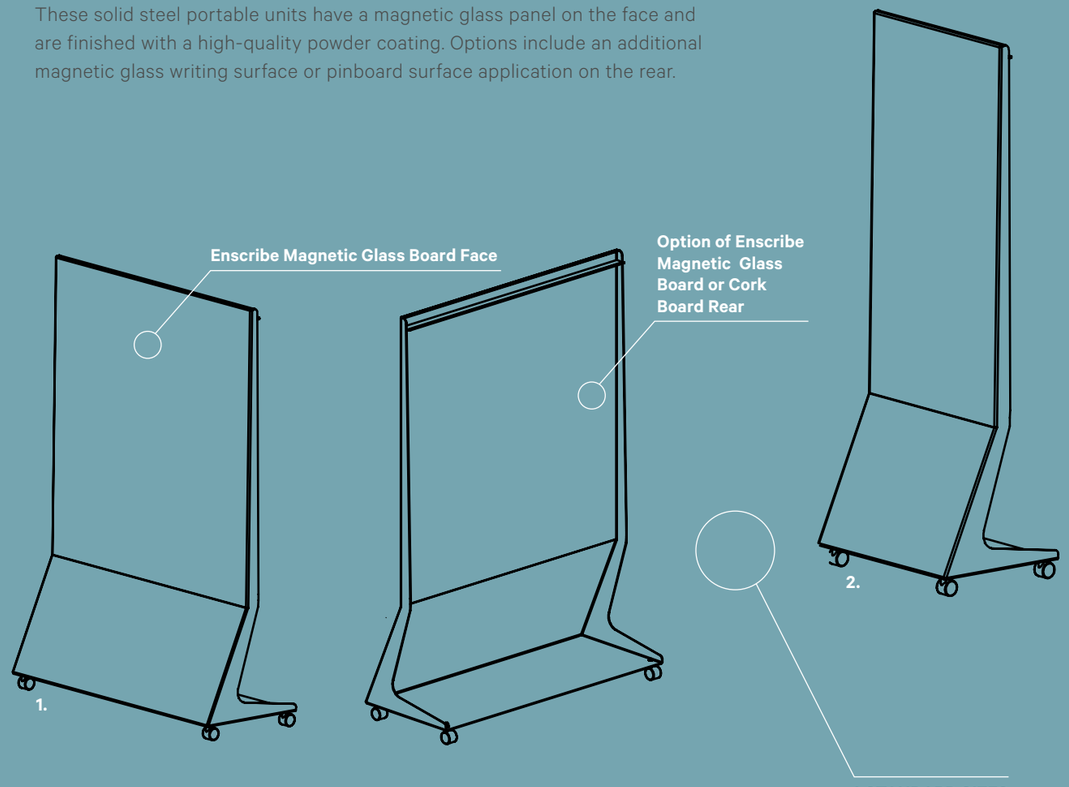
The glass surface will not suffer from ink build up and a regular clean will leave the writing surface looking new.

The life of the magnetic glass writing surface is significantly longer than standard whiteboard surfaces.

The magnetic feature of the glass is a major benefit for presentation and display options.

ENSCRIBE MOBILE MAGNETIC GLASS BOARDS

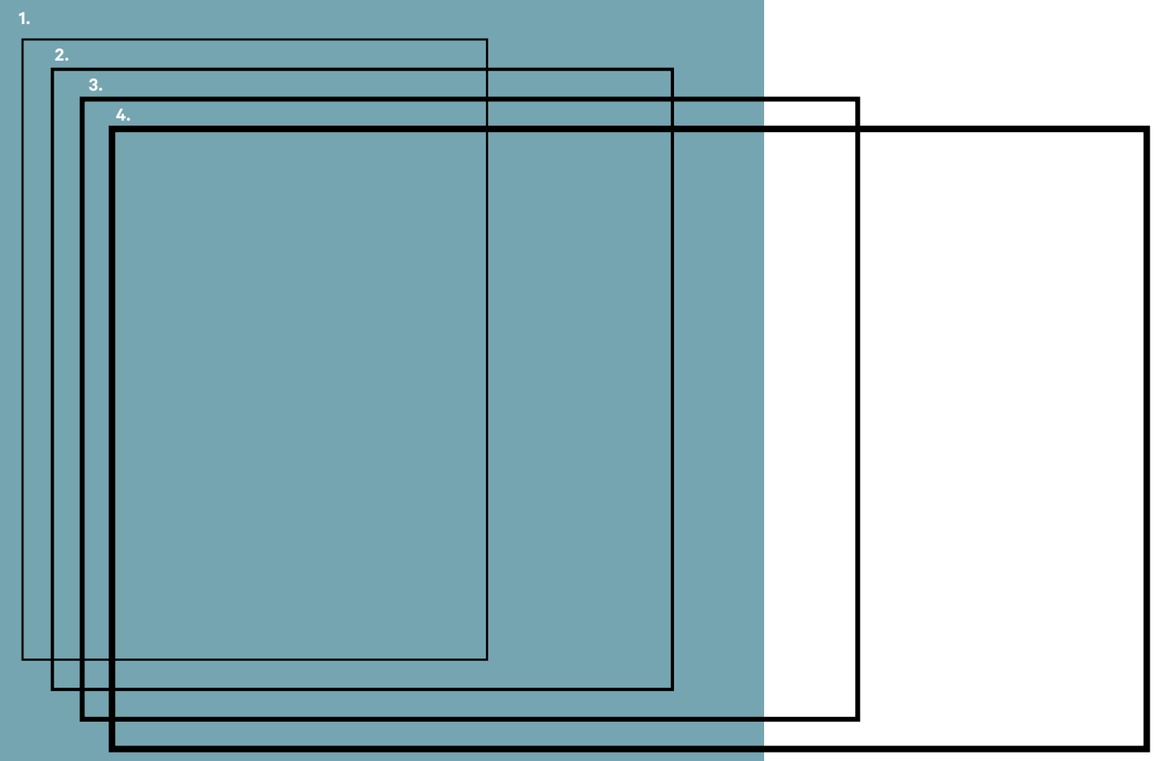
These solid steel portable units have a magnetic glass panel on the face and are finished with a high-quality powder coating. Options include an additional magnetic glass writing surface or pinboard surface application on the rear.



4 STANDARD SIZES
1. 600: Writing/Pinning Surfaces 600 x 1200 / Base: 620 x 1805 x 500 mm (WxHxD)
2. 1200: Writing/Pinning Surfaces 1200 x 1200 / Base: 1220 x 1805 x 500 mm (WxHxD)
3. 1500: Writing/Pinning Surfaces 1500 x 1200 / Base: 1520 x 1805 x 500 mm (WxHxD)
4. 1800 Writing/Pinning Surfaces 1800 x 1200 / Base: 1820 x 1805 x 500 mm (WxHxD)

ENSCRIBE MAGNETIC GLASS BOARDS

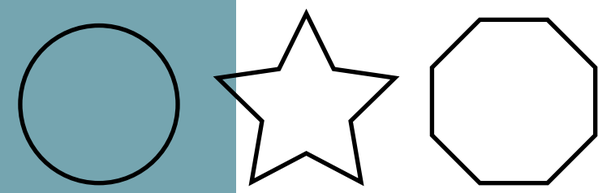
With a solid steel frame and magnetic glass panel on the face our boards can be easily mounted onto any wall.



4 STANDARD SIZES
1. 900 x 1200mm Writing/Pinning Surfaces
2. 1200 x 1200mm Writing/Pinning Surfaces
3. 1200 x 1500mm Writing/Pinning Surfaces
4. 1200 x 2000mm Writing/Pinning Surfaces

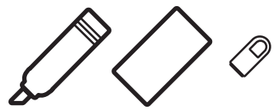
SHAPE? SIZE?

Bigger, smaller, circle, star, octagonal. We can manufacture Enscribe Magnetic Glass Boards to almost any shape.



ACCESSORIES

Each Enscribe Magnetic Glass Board is supplied with 3 strong magnets, a dry erase pen and a magnetic eraser. The supplied pen hangs from the included magnets, so no pen trays are necessary! Also available separately.



Dry Erase Pen, Magnetic Eraser and Magnets included

DELIVERY AND INSTALLATION

Most orders can be delivered within 6 weeks.

STAY FOCUSED

1. The Men's Journal suggests mud-mapping your top level objectives. Place them front and centre

2. Researchers at the University College of London suggests adding distractions reduces distractability. Play music without lyrics.

3. Harvard psychologist Paul Seli suggests that pausing occasionally to let your mind wander will reinvigorate your focus. Make sure these breaks are short and don't involve social media.

4. According to clinical psychologist Joan Klagsburn, stressors draw your attention away from productivity. Use tech to your advantage. Turn off the world, ask your co-workers to give you space and retreat to the privacy of an acoustic booth or pod.

5. Grab a cup of coffee. It's true, there is a link between caffeine and cognition. If you're not a fan of coffee, tea and dark chocolate will also give you that boost with an added bonus of a good dose of anti oxidants,

6. Pay attention to yourself. Author Daniel Goleman suggests that noticing when your mind wanders gives you the chance to think, 'my mind has wandered again' which sparks brain circuits to help you get back on track.

7. Work in 60-90 minute blocks. As we work, our alertness drops off, increasing the lure of distractions. Set a timer and take a break at the end of each cycle.

S.C.A.M.P.E.R.

A booth, a board and a focused **S.C.A.M.P.E.R.** mini meeting.

S.C.A.M.P.E.R. is essentially a process for expanding and improving upon ideas by testing and questioning them from different angles. For each letter of the mnemonic, ask yourself a related question about your project or the problem at hand:

S = Substitute, e.g.: What would happen to the project if we swapped X for Y?

C = Combine, e.g.: What would happen to the project if we combined X and Y?

A = Adapt, e.g.: What changes would need to be made to adapt this project to a different context?

M = Modify, e.g.: What could we modify to create more value on this project?

P = Put to another use, e.g.: What other uses or applications might this project have?

E = Eliminate, e.g.: What could we remove from the project to simplify it?

R = Reverse, e.g.: How could we reorganize this project to make it more effective?

This method forces you to approach your project or problem in unexpected ways. Each question asks you to dig a little deeper into the issue and consider new possibilities..
