Framery Booth Installation, Maintenance and Warranty Services

Envoy is a certified and authorised provider of installation, maintenance, and warranty services for the complete range of Framery pods. With over 10 years of experience working with Framery, we have a dedicated team that understands Framery products inside and out. We also understand the specific needs of Australia's most influential companies and institutions, architects, interior designers, and specifiers.

Our in-house installation team is Framery factory-trained to handle and assemble both new and legacy products, ensuring a seamless setup. We also manage pod commissioning and coordinate directly with Framery for client warranty registration and activation.

To support our installation and service capabilities, Envoy maintains critical spare parts at our service centres located across Australia, including Perth, Melbourne, Brisbane, and Sydney.

Our team provides on-site expertise to coordinate with mechanical and electrical contractors for the installation of fire protection and early warning systems, such as sprinkler inserts, EWIS preparation, smoke detectors, and strobes. We also facilitate the integration of Ethernet cables into the pods, as well as seismic bolt-downs where required.

Envoy also provides comprehensive relocation services, handling everything from simple office churn to interstate relocations, using our fleet of dedicated, fully equipped vehicles.

We pride ourselves on delivering exceptional customer service. Please don't hesitate to reach out to us anytime with your Framery pod needs.
